This map displays 2008 National Agriculture Imagery Program (NAIP) digital orthophotography for the State of Connecticut. It is color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken on July 3rd, 10th, 13th, and 16th. This digital orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identification and mapping of land use. The image and color balance between individual input images is not consistent so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers may not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, minor, railroads, and utility crossings are displayed but may not match the location of each feature on the ground. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA Farm Service Agency through the Naval Photographic Center Office in Bethesda, MD.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, property, and waterbodies. Base map data is not to scale and is not complete. Street data is based on the Federal Geographic Data Committee.
