This map displays 2008 National Agriculture Imagery Program (NAIP) infrared orthophotography for the State of Connecticut. It is a color infrared, leaf on, 3.39 feet (1 meter) aerial survey taken on July 3rd, 18th, 25th, and 30th. This infrared orthophotography provides many services, such as observing crop and vegetation conditions as well as supporting identifications and mapping of woodland area. Infrared orthophotography contains differences between individual input images that are not corrected so differences are present in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photo. Street-level data such as major interstates, US routes, state routes, minor roads, and MSBO cruising will be displayed but may not match the locations of such features on the base map digital spatial data shown on this map.

Map is not colorfast.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USDA’s Farm Service Agency through the aerial photography field office in North Dakota.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, towns, boundaries, property, and schools. Base map data is provided through the Connecticut Department of Energy and Environmental Protection.
