EXPLANATION

This map displays 2008 U.S. Geologic Survey (USGS), High Resolution orthophotography for the Bridgeport, Hartford, and New Haven area in a natural color, leaf-off, false color (080607) imagery. The aerial survey was flown during the spring of 2008 using an unpressurized aircraft and is a product of the Bridgeport Environmental Monitoring Program. It also provides support in property tax review, environmental monitoring, as well as other applications. The minimum amount of color balance in each小幅 image is one centered which will cause differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers well not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection data. Newer data such as maps and orthophotography are displayed but the locations of such features may differ from the orthophotography. Also shown are airports, hospitals, educational facilities, data stations, and more landmarks. Important geographic locations and variations are labeled.

DATA SOURCES

ORTHOPHOTOGRAVHY - Provided by the U.S. Geological Survey.
BASE MAP DATA - All data is based on 1:2400 scale and displays geographic names, places, and their symbols, town boundaries airports, and others. This map data is subject to copyright restrictions. Some data is subject to copyright restrictions.
SCL MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of others in PDF format. Visit the CT DEP website to download the free map digital spatial data shown on this map.
