EXPLANATION

This map displays 2008 U.S. Geological Survey (USGS), High Resolution Orthoimagery for the Empiretown, Hardwick, and New Haven town in a natural color leaf off, 1 foot (0.305 meter) imagery. The aerial survey was taken during the Spring of 2008 and is important information for the community layout purpose. The map also provides support in property line review, planning. It also provides support in property line review, environmental monitoring, as well as other applications. The map is not color balanced so tones balances between individual input image is not constant which will cause differences in the shade and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not match perfectly. The accuracy of digital orthophotography is on the order of 1 meter. Also, please note that data collected on the ground is subject to interpretation and can vary widely. Furthermore, the map is not meant to be drawn with a scale. The map is drawn to scale for the purpose of visualizing the geographic information.

DATA SOURCES

ORTHOPHOTOGRAPHY - Provided by the U.S. Geological Survey.
BASIS MAP DATA - All data is based on 1:12,000-scale and displays geographic features, classes of maps, and boundaries. Base map data is subject to change and update. Some data has been updated to serve the needs of the map.

USE AND DISCLAIMER DATA - Visit the DEP website for the map and a variety of others in PDF format. Visit the DEP website to download the base map digital spatial data shown on this map.

Map prepared by CT DEP, December 2010. Map is not color balanced. Protect from light and moisture.
