2008 Color Ortho photo Leaf-Off
East Haven, CT
(North)

EXPLANATION
This map displays 2008 U.S. Geological Survey (USGS) High Resolution orthophotography for the Bridgeport, Stratford, and New Haven area and is a color, leaf-off, 1-foot (30,000 meter) imagery. The aerial survey was conducted during the Spring of 2008 and is not intended for general purpose cartography or planning. It also provides support in property tax review, environmental monitoring, as well as other applications. The resolution of the imagery is not color balanced so tonal differences between individual input images can exist resulting in small color differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match orthophotography due to differences in spatial accuracy. For example, larger buildings are shown as such but finer details such as windows are not visible. The location of each feature may differ from the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and tree boundaries. Important geographic locations and boundaries are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Provided by the U.S. Geological Survey.
BASE MAP DATA - All data is based on 1:2,000 scale and displayed geographic names, places and their symbols, town boundaries, airports, and railroads. Base map data a subject to current accuracy. State data content is subject to change. Base map data includes the following: topography, roads, railroads, city/town boundaries, airports, and railroads. Additional data includes the following: all streets, airports, hospitals, educational facilities, train stations, and tree boundaries. Important geographic locations and boundaries are labeled.

MAPS AND DIGITAL DATA - Visit the DEP website for this map and a variety of others is DEP found. Visit the DEP website to download the base map digital spatial data shown on this map.

Map prepared by CT DEP, December 2010.
Map is not colored.
Printed in black and white.
