2008 Color Ortho Leaf-Off
West Hartford, CT

EXPLANATION
This map displays 2008 U.S. Geological Survey (USGS) High Resolution Orthophotography for the Bridgeport, Hartford, and New Haven area in colored leaf off, 1 foot (0.3048 meter) imagery. The aerial survey was taken during the spring of 2008 and is proprietary to the United States Government. The map format is an overhead perspective map prepared by CT DEP, December 2010. The map is not colorfast. The data used for the final map was color encoded, printed, and mounted on a map base. Street and railroads. The color and intensity of colors depending on the area viewed. The location and name of features in other GIS layers will not necessarily match information shown in the aerial photography primarily due to differences in spatial accuracy, color and collection dates. The street data such as name, number, and direction are displayed but the locations of such features may differ from the orthophotography. Also shown are airports, highways, educational facilities, fire stations, and other features. Important geographic locations and boundaries are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - Provided by the U.S. Geological Survey.
BASE MAP DATA - USGS orthophotos are based on 1:2,400 scale and display geographic names, places and their symbols, town boundaries, airports, and railroads. They can also be under current rectification. Road data are derived from the Connecticut Department of Transportation. Street names and directions are shown. Other data from Federal, State, and local agencies, and a variety of others in GIS format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

Map prepared by CT DEP, December 2010. Map is not colorfast. Map is not colorfast.
