This map displays 2009 Capital Region Council of Governments (CRCOG) orthophotography. The imagery is very high-resolution, with each pixel measuring one foot. The orthophotography was collected using aerial photography primarily due to differences in spatial accuracy and data collection dates. Most (but not all) major interstates, US routes, state and major intercity railroads, airports, and rivers were digitized using orthophotography. Also shown on the map are airports, highways, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
- This product is derived from the data of the Capital Region Council of Governments (CRCOG) and the Connecticut Office of Policy Management.
- BASE MAP DATA - All data is based on U.S. 1/2" (1:62,500) scale and displays geographic names, physical and human variables, town boundaries, airports, and rivers. Some map data in multiple layers are complete. More data is based on U.S. 1/2" (1:62,500) scale.
- WATERBODIES - Visit the CT DEP website to download free base map digital spatial data on this map.

EXPLANATION
- The orthophotography is very high resolution, with each pixel measuring one foot. The orthophotography was collected using aerial photography primarily due to differences in spatial accuracy and data collection dates. Most (but not all) major interstates, US routes, state and major intercity railroads, airports, and rivers were digitized using orthophotography. Also shown on the map are airports, highways, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
