This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, leaf-on, 5.59 ft (1 meter) aerial survey taken in the Spring of 2010. The statewide mosaic is not color balanced and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match those shown on the Orthophotography. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the U.S. Department of Agriculture through the National Agricultural Imagery Program's Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:31,680 scale and displays geographic names, places and their symbols, county boundaries, airports, and railroads. These map data is neither current nor complete. Street data is based on 1989/1991 copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for the map and a variety of other user generated data. This CT DEP website is a service of the Land Use Planning Information and Standards Unit through the Geospatial Program Unit managed by the Division of Planning and Geographic Information Services.
