EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a single color, false color, 5.59 foot (1 meter) aerial survey taken in the Spring of 2010. The orthophotography is not color balanced so tonal balance between individual input images is not conserved. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, barges, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), provided by the USDA Forest Service Agency through the National Photographic Field Office in Salt Lake City.
BASE MAP DATA - All data is based on U.S.G.S. maps and displays geographic names, places and their attributes, town boundaries, cities, and railroads. Data map data is neither current nor complete. Street data is located on multiple digital orthophotography data.
MAPS AND DIGITAL DATA - Visit the CT DSG website for the map and a variety of other Arc GIS layers. Visit the CT DSG site to download the base map digital spatial data used on this map.

Map prepared by CT DSG, January 2011. Map is not suitable for legal use or navigation.
