This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a near true color, false color, 0.625 meter aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced so tonal variations between individual image units are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railways, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, main stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP), is provided the USDA through NAIP Program Office in Salt Lake City.
BASE MAP DATA: All data is based on USDA scaled and digitized geographic sources: places and their symbols, lines, boundaries, airports, and railroads. Data may not match other printed or electronic data due to different scales and interpretations.
MAPS AND DIGITAL DATA: Visit the CT ECO website for the latest GIS data and a variety of other data sets. Visit the CT ECO website to download the base map digital data files used on this map.
