EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.39 feet (1 meter) aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced so tonal differences between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Streets-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP) is provided by the USGS of the US Forest Service through the National Photographic Field Office in Salt Lake City, Utah.

BASE MAP DATA - All data is based on USGS 7.5' quad sheets and displays geographic names, places and their symbols, town boundaries, ages, and outlines. This map data is neither current nor complete. Street data is based on USGS quadrangle map data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of articles in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map. 2010 Orthophoto Map: Work in progress - Professional Level Editing and validation.

Protect from light and moisture.

Map is not colorfast.
