This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false on, 3.39 feet (1 meter) aerial survey taken in the Spring of 2010. The orthophotography is not color balanced so visual differences between individual input images is not conserved. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed so may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the U.S. Dept of Agriculture through the National Agricultural Imagery Program Field Office in South Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, river boundaries, streams, and boundaries. These map data is neither current nor complete. Street data is based on 1:4000 orthophotographed data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of other maps at www.ct.gov. Visit the CT DEP website to download the base map digital spatial data derived on this map.
