This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.59 foot (1 meter) aerial survey taken in the Spring of 2010. The blue-purple color is not color balanced so tonal imbalances between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railways, and very courtyards are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and landmarks are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Agricultural Imagery Program (AIP) Office at Salt Lake City.
BASE MAP DATA - All base data is based on 1:24,000 scale and displays geographic names, places and their symbols, large boundaries, airports, and waterbodies. These map data is neither correct nor complete. Street data is based on: TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in the area. Use the CT DEP website to download the base maps digital orthophoto data shown on this map.
