2010 Color Orthophoto
Newtown, CT
(East)

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false col, 5.59 feet (1 meter) aerial survey taken in
the Spring of 2010. The interpretive medium is not color balanced
so total balances between individual input image is not
converted. This will cause differences in the range and
intensity of colors depending on the area viewed. The location
and shape of features in other GIS layers will not exactly match
information shown in the aerial photography primarily due to
differences in spatial accuracy and data collection dates.
Street-level data such as major interstates, US routes, state
roads, rivers, railroads, and ferry crossings are displayed on
this map; however, the locations of such features on the
orthophotography may not match the locations of such features
on the orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP), provided by the
USDA, proceeds from the Farm Service Agency through the National Photographic Field Office in Salt Lake City,
UT.
BASE MAP DATA: All data is based on U.S. DOI and displays geographic names, places and
their symbols, land boundaries, highways, and natural features. This map data is neither current nor
complete. Street data is based on Microsoft’s copyrighted data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for the map and a variety of other ection of
DEP’s services. Visit the CT DEP website for the map and a variety of other ection of
