This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false-color, 1-foot (30 centimeter) aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced so tonal values between individual input images are not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match those shown on this map. Accuracy to within 5.79 feet (1 meter) is intended. Street-level data such as major interstates, U.S. routes, state routes, airports, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on U.S.D.A. soils and displays geographic names, places and their symbols, roads, boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on U.S.D.O. digitized maps.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
