This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color 3.59 ft (1 meter) aerial survey taken in the Spring of 2010. The color of an image is not color-balanced so tonal differences between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match.

Information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed and may not match the locations of such features on the orthophotography. Also drawn are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP). Data provided by the USGS of USGS Science Subway through NAIP Photography Field Office in Wall Lake, CO.
BASE MAP DATA - All data is based on 1:24,000-scale and displays geographic features, places and their boundaries, cities, boundaries, drainage, and wetlands. These map data is neither current nor complete. Street data is based on State/Local geographical data.
MAPS AND DIGITAL DATA - Visit the GIS website for this map and a variety of others in JPEG format. Visit the CT DEP website to download the base map digital data sources on this map.
