2010 Color Orthophoto
Thompson, CT
(East)

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.59 foot (1 meter) aerial survey taken in the Spring of 2010. The orthophotography is not color balanced so tonal differences between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and date collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office (APFO) in Salt Lake City.
BASE MAP DATA - All data is based on U.S.G.S. scale and displays geographic names and places and their symbols, town boundaries, airports, and railroads. Data map data is neither current nor complete. Street data is based on data sources; proprietary data.
MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in the area. NEWS - This map was created by the GIS Mapping Office at the CT DEP, January 2011.
