This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on, 3.39 feet (1 meter) aerial survey taken in the Spring of 2010. The materials measured in our color balanced so total abundance between individual input image is not constrained. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, drives, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), provided by the USDA's Farm Service Agency through the National Photogram Facility Office in Salt Lake City.

BASE DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, city, and state. The map data is neither current nor complete. Street data is based on Tele Atlas geocoded data.

MAPS AND DATA LINKS - Visit the CT GIS website for this map and a variety of other in PDF format. Visit the CT DNR website to download the base map digital orthophotography data on this map.
