This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.59-foot (1 meter) aerial survey taken in the spring of 2010. The statewide mosaic is not color balanced so total brightness between individual input images is not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streams, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USGS of Farm Service Agency through the National Photographic Field Office in Salt Lake City.
BASE MAP DATA - All data is based on USGS 15’ level data and digital geographic names, places and their symbols, town boundaries, airports, and railroads. Data map data is neither current nor complete. Street data is based on: TeleAtlas copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of online or PDF versions. Visit the CT DEP website to download the free map digital spatial data shown on this map.
