This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a 3.59 foot (1 meter) aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced so tonal imbalances between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USGS and Farm Service Agency through the Public Photographic Field Office in St Louis, MO.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and town names, town boundaries, city, town, and sectional surveys. These map data is neither current nor complete. Street data is based on State/Local orthophotographed data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
