2010 Color Orthophoto
Newington, CT

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.59-foot (1 meter) aerial survey taken in the Spring of 2010. The resulting image is not color balanced so tonal differences between individual input images are not converted. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed as they may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP), is provided by the USDA Foreign Agriculture Service through the NAIP Photograph Field Office in Suitland, MD.
BASE MAP DATA: All data is based on 1:24,000 scale and displays geographic names, places, and their physical features, boundaries, elelments, and wrinkles. This map data is neither current nor complete. Street data is based on state/local, topographic data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for the map and a variety of other data in PDF format. Visit the CT DEP website to download the free map digital topographic data here on this map.

Map prepared by CT DEP, January 2011. Map is in public domain. Printed with color and permission.
