This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on, 3.39 feet (1 meter) aerial survey taken in the spring of 2010. The natural color leaves are not color balanced so total reflectance between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, dams, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**

**ORTHOPHOTOGRAPHY** - National Agriculture Imagery Program (NAIP), is provided by the USDA National Agriculture Imagery Program, (NAIP), is provided by the USDA National Agricultural Statistics Service (NASS). It is a natural color, leaf on, 3.39 feet (1 meter) aerial survey taken in the spring of 2010. This is a natural color, leaf on, 3.39 feet (1 meter) aerial survey taken in the spring of 2010. Major interstates, US routes, state routes, dams, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography.

**BASE MAP DATA** - All data is based on 1:24,000 scale and displays geographic features such as roads, railroads, airports, and waterbodies. This map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

**MAPS AND DIGITAL DATA** - Visit the CT ECO website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.

**EXPLANATION**
