2010 Color Orthophoto
Oxford, CT
(North)

EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotographs for the State of Connecticut. It is a natural color, false color, 3.59 ft (1 meter) aerial survey taken in the Spring of 2010. The statewide mosaic is not color balanced so tonal balances between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also drawn are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), A provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1/4 ORDN scale and displays geographic names, places and their symbols, county boundaries, highways, and railroads. This map data is not complete. Street data is based on Telephone/registered data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the two-map digital clipped data sheets on this map.

Map prepared by CT DEP, January 2011. Map is not suitable for precise location and orientation.
