This map displays 2010 National Agricultural Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a base color, fused at ~5.59 feet (1 meter) resolution taken in the Spring of 2010. The individual image is a color balanced so that individual image is not saturated. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

**DATA SOURCES**

ORTOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP), is provided by the USGS Earth Resources Observation and Science Center (EROS Center). BASE MAP DATA: All data is based on USGS data and displays geographic names, places and names included in base name; categories, symbols and values. Base map data is neither current nor complete. Street data is based on Tele Atlas cartographic data.

MAPS AND DIGITAL DATA: Visit the CT DEC website for the map and a variety of other is in PDF format. Visit the CT DEC website to download the base map digital orthophoto data shown on this map.
