2010 Color Orthophoto
Danbury, CT
(Northwest)

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
neutral color, false-on, 0.579 feet (1 meter) aerial survey taken in
the Spring of 2010. The neutral tone is not color balanced
so tonal differences between individual input images may be
preserved. This will cause differences in the range and
intensity of colors depending on the area viewed. The location
shape and style of features in other GIS layers may not exactly match
information shown in the aerial photography primarily due to
differences in spatial accuracy and data collection times.
Street-level data such as major intersect, US routes, main
routes, streets, railroads, and ferry crossings may be displayed as
may not match the locations of such features on the
orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), as provided by the
U.S. Department of Agriculture through the Agricultural Imagery Program Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:50,000 scale and displays geographic names, places and
their symbols, town boundaries, highways, and railroads. This map data is neither current nor
complete. Street data is based on 1:24,000 orthophotographed data.
MAPS AND DIGITAL DATA - Visit the CT DEP website to download the base map digital orthophotoviewers data shown on this map.
