EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a normal color, false color 3.59 foot (1 meter) aerial survey taken in the Spring of 2010. The material shown is not color balanced or tone balanced so the differences between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data rendition dates. Street-level data such as major interstates, US routes, state routes, drives, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City, UT.

BASE MAP DATA - All data is based on USGS scales and depicts geographic sources, places and their features, state boundaries, county, and municipalities. These map data is neither current nor complete. Street data is based on Telephone/telegaph data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of items at www.ct.gov. Visit the CT DEP website to download the base map digital layered data from the map.
