2010 Color Orthophoto
New Milford, CT
(Northwest)

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 3.59 foot (1 meter) aerial survey taken in
the Spring of 2010. The orthorectified images are not color balanced
so tonal differences between individual input images is not
corrected. This will cause differences in the range and
intensity of colors depending on the area viewed. The location
and shape of features in other GIS layers will not exactly match
information shown in the aerial photography primarily due to
differences in spatial accuracy and data collection dates.
Street-level data such as major interstates, US routes, state
routes, streets, railways, and ferry crossings are displayed; but
may not match the locations of such features on the
orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the
USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:24,000 scale and depicts geographic names, places and
their outlines, town boundaries, distances, and elevations. This base map data is neither current nor
complete. Street data is based on TeleAtlas copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of others in
PDF format. Visit the CT DEP website to download the base map digital aerial data shown on this
map.
