This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.59 ft (1 meter) aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced so tone differences between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match.

Information shown in the aerial photography primarily due to differences in spatial accuracy and data resolution data. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USGS of the Earth Resources Observation and Science (EROS) Center.

BASE MAP DATA - All data is based on USGS base and displays geographic names, places and their symbols, state boundaries, cities, and villages. Data map data is neither current nor complete. Street data is based on EROS/ORNL orthophographed data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in complete. Street data is based on TeleAtlas copyrighted data.
