This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.59-foot (1 meter) aerial survey taken in the Spring of 2010. The orthophotography is not color balanced so colors observed between individual input images are not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry connections are displayed at may not match the locations of such features on the orthophotograph. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agriculture Imagery Program (NAIP), is provided by the USDA of Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA: All data is based on 1:50,000 scale and displays geographic names, places, and their symbols, county boundaries, depots, and railroad. Data map data is neither current nor complete. Street data is based on July/August orthophotographed data.
MAPS AND DIGITAL DATA: Visit the CT DEP website for the map and a variety of others in PDF format. Visit the CT DEP website for the map and a variety of others in PDF format. Visit the CT DEP website for the map and a variety of others in PDF format.
