2010 Color Orthophoto
Roxbury, CT

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false color, 3.59 foot (1 meter) aerial survey taken in
the Spring of 2010. The intervenable mosaic is not color balanced
so total intangibles between individual input image is not
consistent. This will cause differences in the range and
intensity of colors depending on the area viewed. The location
and shape of features in other GIS layers will not exactly match
information shown in the aerial photography primarily due to
differences in spatial accuracy and data collection times.
Street-level data such as major interstates, US routes, state
routes, streets, railroads, and ferry crossings are displayed but
may not match the locations of such features on the
orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the
USDA, Farm Service Agency through the National Agriculture Imagery Program Field Office of Salt Lake City, UT.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and
their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete.
Street data is based on USGS/Esri base map data.

MAPS AND DIGITAL DATA - Visit the CT ECO website for this map and a variety of others in
2010 Color Orthophoto. This map is not available as a
PDF or vector file.

Map prepared by CT DEP, January 2011. Map is not intended for legal use or construction.
