2010 Color Orthophoto
Scotland, CT

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.59 foot (1 meter) aerial image taken in the Spring of 2010. The inevitable mosaic is not color balanced so total luminance between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstate, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP). Provided by the USGS (the US Department of the Interior, US Geological Survey) and the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA: All data is based on USGS base maps and displays geographic names, plats and other publicly known boundaries, airports, and railroads. Data map data is neither current nor complete. Street data is based on the GIS layers of orthophotography.
MAPS AND DIGITAL DATA: Visit the CT DEP website for this map and a variety of others as PDF images. Visit the CT DEP website to download the base maps digital spatial data shown on this map.

Map prepared by CT DEP, January 2011. Map is not colorfast. Protect from light and moisture.

North American Datum of 1983
Lambert Conformal Conic Projection

Important geographic locations and waterbodies are labeled.
