This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.59 foot (1 meter) aerial survey taken in the Spring of 2010. The orthorectification is not color balanced so color balance between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and size of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on USGS scale and displays geographic features such as public and private parcels, boundaries, airports, and railroads. Data map data is neither current nor complete. Street data is based on publicly accessible data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data derived on this map.

EXPLANATION
Protect from light and moisture.
