This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotographs for the State of Connecticut. It is a natural color, false-color, 3.39-foot (1 meter) aerial survey taken in the Spring of 2010. The orthophoto map is on a color-balanced scale, so tonal enhancements between individual input images are not concealed. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, rivers, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the UNAVCO Program Service Agency through the NAIP Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic corners, places and their symbols, town boundaries, airports, and railroads. Some map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital spatial data shown on this map.
