This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.59-foot (1-meter) aerial survey taken in the Spring of 2010. The materials may not be color balanced so total enhancements between individual input images are not equivalent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, county roads and state highways are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP). is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on 1:12,000 scale and displays geographic names, places and their symbols, states boundaries, highways, and railroads. Data is current except for changes made annually to complete street data. Some data is based on 1:24,000 aerial photography data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of other data sets. Visit the CT DEP website to download the base map digital data shown on this map.

EXPLANATION
Map prepared by CT DEP, January 2011.
Printed on light and durable.
