2010 Color Orthophoto
Danbury, CT (Southeast)

EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a
natural color, false colr, 0.579 foot (1 meter) aerial survey taken in
the Spring of 2010. The orthophotography is not color balanced
so total brightness between individual input image is not
constant. This will cause differences in the range and
intensity of colors depending on the area viewed. The location
and shape of features in other GIS layers will not exactly match
information shown in the aerial photography primarily due to
differences in spatial accuracy and data collection dates.
Street-level data such as major interstates, US routes, state
routes, streets, railroads, and ferry crossings are displayed but
may not match the locations of such features on the
orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the
USDA National Agricultural Imagery Program (NAIP) and is not color balanced. Street-level data
may not match the locations of such features on the
orthophotography. Also shown are airports, hospitals,
educational facilities, train stations, and town boundaries.
Important geographic locations and waterbodies are labeled.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places
and their symbols, major highways, airports, and railroads. These map data is neither current nor
complete. Street data is based on Esri/ного orthophotography data.
