EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color 5.79 foot (1 meter) aerial survey taken in the spring of 2010. The orthoimage mosaic is not color balanced so color differences between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitats, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP). A product of the USDA Forest Service, provided by the USDA National Agriculture Imagery Program (NAIP) Orthophoto Project Office (OPP) in Salt Lake City.

BASE MAP DATA - All data is based on S/USGS scale and displays geographic counties, place names and their symbols, county boundaries, highways and railroads. This map data is neither current nor complete. Street data is based on TeleAtlas orthophographed data.
