Important geographic locations and waterbodies are labeled. The intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NADP) orthophotography for the State of Connecticut. It is a 1 meter base, leaf on, 1.39-foot (1 meter) aerial survey taken in the Spring of 2010. The statewide mosaic is not color balanced so total emphasis between individual input images is not constant. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NADP), provided by the USDAs Farm Service Agency through the National Photographic Fund Office in Falls Lake, NC.
BASE MAP DATA - All data is based on 1/3,000 scale and displays geographic names, places and their symbols, town boundaries, airports, railroads. These data sources are neither current nor complete. Street data is based on state/county/updated data.
