This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotographs for the State of Connecticut. It is a natural color, false color 3.39 foot (1 meter) aerial survey taken in the Spring of 2010. The natural color is not color balanced so tonal imbalances between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, airports, railroads, and ferry crossings are displayed as may not match the locations of such features on the orthophotography. Also shown are parks, hospital, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP). It is provided by the USDA's Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1/4 U.S. quad scale and displays geographic names, places and their symbols, roads, boundaries, demographics, and waterbodies. Data map data is neither current nor complete. Street data is based on Garmin's copyrighted data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other in PDF format. Visit the CT DEP website to download the free map digital spatial data shown on this map.
