This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf-on, 0.599 foot (1 meter) aerial survey taken in the Spring of 2010. The inherent nature is not color balanced so tonal variations between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and many courthouses are displayed but may not match the locations of such features on the orthophotography. Also drawn are airports, hospitals, educational facilities, town oications, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USGS of the National Geospatial-Intelligence Agency through the NAIP Ortho-Photography Field Office in Salt Lake City, Utah.

BASE MAP DATA - All data is based on USGS 1:100,000 scale and depicts geographic names, places, and their symbols, county boundaries, airports, and railroads. Data map data is neither current nor complete. Street data is based on topography/orthophotography data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of other data for the State of Connecticut. Visit the CT DEP website to download the free map digital orthophoto data on this map.
