EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on, 0.599 foot (1 meter) aerial survey taken in the Spring of 2010. The orthophotography is not color balanced so tonal differences between individual input images are not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, expressways, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USDA’s Farm Service Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP DATA - All data is based on USGS 1:24,000-scale quadrangles in the North American Datum of 1983 (NAD83) and the World Geodetic System 1984 (WGS84). Data accuracy and completeness vary based on individual data sources.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other maps and data. Visit the CT DEP website to download the base map digital version data sources on this map.
