This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a national color, leaf-on, 0.59-foot (1 meter) aerial survey taken in the Spring of 2010. The natural color product was developed so that adjacent land cover classes are easily discernible. The use of color enhances the visual appearance of the map and makes it easier to differentiate between land use and land cover features. The map is provided by the United States Department of Agriculture, Natural Resources Conservation Service, and is available for public use.

EXPLANATION

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) orthophotography provided by the United States Department of Agriculture, Natural Resources Conservation Service. This data was acquired and processed by the United States Geological Survey and is held in the National Agriculture Imagery Program (NAIP) Orthophoto Data Base.

BASE MAP DATA - All data is based on U.S.G.S. 7.5 minute quad sheets and displays geographic names, places and their boundaries, town boundaries, cities, and major roads. This base map is neither current nor complete. Street data is based on 1989 U.S.G.S. orthophotography data.
