This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.5-foot (1 meter) aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced to create differences in spatial accuracy and data collection dates. The statewide mosaic is not color balanced to create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the USDA Forest Service Agency through the National Agricultural Imagery Program Office in Salt Lake City.
BASE MAP DATA - All data is based on USGS scale and displays geographic names, places and their symbols, town boundaries, highways, and waterbodies. This map data is neither current nor complete. Street data is based on Ortho/ASD orthophotography data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of other GIS services. Visit the CT DEP website to download the base map digital orthophoto data shown on this map.

EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 0.5-foot (1 meter) aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced to create differences in spatial accuracy and data collection dates. The statewide mosaic is not color balanced to create differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.
