2010 Color Orthophoto
Ellington, CT
(West)

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.39-foot (1 meter) aerial image taken in the spring of 2010. The image represents natural color balanced so that differences between individual input image is not canceled. This will cause differences in the image and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also drawn are airports, highways, educational facilities, train stations, and town boundaries. Important geographic features and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), as provided by the US Department of Agriculture through the Aerial Photography Field Office in Salt Lake City.
BASE MAP DATA - All data is based on USGS 1:24,000 scale and displays geographic names, places and their associated town boundaries, airports, and railroads. Digital data is neither current nor complete. Street data is based on 5-digit block group geographical data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for the map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital imagery data as in this map.

Map prepared by CT DEP, January 2011. Map is not suitable for Precise Land use and position.
