EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, leaf on, 3.59 foot (1 meter) aerial survey taken in the Spring of 2010. The statewide mosaic is not color balanced so tonal imbalances between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major intersections, US routes, state routes, streets, railroads, and ferry crossings are displayed so may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational faciliies, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP), is provided by the USGS of the Federal Agency through the Aerial Photography Field Office in Salt Lake City.

BASE MAP/DATA - All data is based on USGS data and displays geographic names, places and their symbols, some boundaries, geographic, political, and administrative. These data sets are not complete. Street data is based on USGS's topographic data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of others in PDF format. Visit the CT DEP website to download the base map digital cadastral data shown on this map.

Map prepared by CT DEP, January 2011. Map is not suitable for legal land description.
