2010 Color Orthophoto  
New Haven, CT  
(West)

EXPLANATION

This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 5.79 foot (1 meter) aerial survey taken in the Spring of 2010. The orthophoto mosaic is not color balanced, so total brightness between individual input images is not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed as they may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographical locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA’s Farm Service Agency through the National Agriculture Imagery Program Field Office at Salt Lake City.

BASE MAP DATA - All data is based on USGS 7.5' scale and displays geographic names, places and their symbols, arrive boundaries, physical, and waterbodies. Base map data is neither current nor complete. Street data is based on lidar/orthoimage data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other in PDF format. Visit the CT DEP website to download the base map digital orthophoto data shown on this map.

Map prepared by CT DEP, January 2011. Map is not calibrated. Please use digital orthophoto data.
