This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a neutral color, false color, 5.79 feet (1 meter) aerial survey taken in the Spring of 2010. The aerial mosaic is not color balanced so tonal imbalances between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection date. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES

ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP), is provided by the USDA Forest Service Agency through the National Photographic Field Office in Salt Lake City.

BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, airports, and railroads. Data map data is neither current nor complete. Street data is based on Microsoft MapPoint data.

MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other maps in PDF format. Visit the DEP website to download the low-map digital orthophoto data from this map.
