This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotographs for the State of Connecticut. It is a natural color, false color, 1.59 foot (1 meter) aerial survey taken in the Spring of 2010. The orthorectified imagery is non-color balanced so tonal balances between individual input image is not consistent. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed but may not match the locations of such features on the orthophotography. Also drawn are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY: National Agricultural Imagery Program (NAIP), is provided by the USDA Farm Service Agency through the National Agriculture Imagery Program, Office or NADL/CIO.
BASE MAP DATA: All data is based on USDA maps and displays geographic features, places and their attributes, state boundaries, airports, and landmarks. This base map data is neither current nor complete. Street data is based on: Telocasts/copyrighted data.
MAPS AND DIGITAL DATA: Visit the CT DSR website for this map and a variety of others in PDF format. Visit the CT DSR website to download the base map digital orthophotos data for this map.
