This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.39 feet (1 meter) aerial survey taken in the Spring of 2010. The orthophotography is not color balanced so tonal anomalies between individual input image is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match those shown in this map, nor will street-level data such as major interstates, US routes, state roads, trains, railroads, and ferry crossings be displayed yet. Rivers and streams are displayed yet differences in spatial accuracy and data collection dates may not match the locations of such features on the orthophotography. Also shown are airports, hospitals, educational facilities, train stations, and town boundaries. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agriculture Imagery Program (NAIP). It is provided by the USGS Earth Science Agency through the Agricultural Photo-Plot Office in Stillwater, OR.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their coordinates, state boundaries, streets, and railroads. Street data is neither current nor complete. Street data is based on TeleAtlas orthophotography data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of similar GIS sources. Visit the CT DEP website to download the base map digital orthophoto data used on this map.

EXPLANATION
This map is not colorfast. Map prepared by CT DEP, January 2011. Map is not suitable for professional or legal use. Present scale 1:12,500.
