2010 Color Orthophoto
Woodbury, CT

EXPLANATION
This map displays 2010 National Agriculture Imagery Program (NAIP) orthophotography for the State of Connecticut. It is a natural color, false color, 3.39 feet (1 meter) aerial survey taken in the Spring of 2010. The orthophotography is in false color, balanced so total brightness between individual input images is not corrected. This will cause differences in the range and intensity of colors depending on the area viewed. The location and shape of features in other GIS layers will not exactly match information shown in the aerial photography primarily due to differences in spatial accuracy and data collection dates. Street-level data such as major interstates, US routes, state routes, streets, railroads, and ferry crossings are displayed yet may not match the locations of such features on the orthophotography. Also shown are airports, landmarks, important geographic locations, and waterbodies. Important geographic locations and waterbodies are labeled.

DATA SOURCES
ORTHOPHOTOGRAPHY - National Agricultural Imagery Program (NAIP) is provided by the U.S. Department of Agriculture through the National Photogram Office in Saint Louis, MO.
BASE MAP DATA - All data is based on 1:24,000 scale and displays geographic names, places and their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on Towns/faxes/ground data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other maps in PDF format. Visit the CT DEP website to download the base map digital spatial data which on this map.

Map prepared by CT DEP, January 2010. Map is not suitable for precise land use and navigation.
