2010 Coastal Natural Color Orthophoto
Old Saybrook, CT

EXPLANATION
This map displays 2010 natural color orthophotography covering areas of coastal Connecticut within 1000 feet of the shoreline and designated tidal wetlands, all offshore islands, and the Connecticut River to the Massachusetts state line. The data was collected between June 15th and 19th, 2010, when the tidal stage was ±1 hour of the predicted tide. Since it was collected during the growing season, the data is obscured some ground features. The 2010 orthophotography used to produce this map has a ground resolution of 1 foot (30 cm) per image pixel. Additional GIS data displayed includes major interstates, US routes, county routes, streams, ferry crossings, airports, hospitals, educational facilities, Rapid transit, and town boundaries. This location and shape of features in the GIS layers may not exactly match information shown in the aerial orthophotography primarily due to differences in spatial accuracy and data collection dates.

DATA SOURCES
ORTHOPHOTOGRAPHY - Imagery compiled by PhotoScience, Inc., and published by the DEP Office of Land Use Programs.
BASE MAP DATA - Data is based on U.S.G.S. scale and displays geographic names, places and their symbols, town boundaries, airports, and railroads. Base map data is neither current nor complete. Street data is based on TeleAtlas copyrighted data.
MAPS AND DIGITAL DATA - Visit the CT DEP website for this map and a variety of other in PDF form. Visit the CT DEP website to download the base map digital spatial data shown on this map.

Map prepared by CT DEP, April 2011. Map is not suitable for legal use or land use planning.
